

August 11, 2003

Dear Medicaid and PeachCare for Kids Providers,

In this payment cycle (August 11, 2003), the Department of Community Health continued to make prospective payments to payees who have providers billing in the below noted categories of service:

- 140 Skilled State Nursing Facility
- 150 Intermediate Care State Nursing Facility
- 160 Intermediate Care Nursing Facility
- 170 Intermediate Care-MR State Nursing Facility
- 200 Home Health Services
- 320 Durable Medical Equipment Services
- 330 O & P Services
- 440 Community Mental Health Services
- 542 Rural Health
- 680 Mental Retardation Waiver Program
- 681 Community Habilitation and Support Services Waiver Program
- 690 Hospice
- 770 Waivered Home Care Services
- 930 SOURCE Program

The prospective payments were offset by the paid claim amount processed in this payment cycle. For all other providers, in this payment cycle, your payment amount is based on actual paid claims in the system.

For most providers in COS other than those listed above, DCH will apply 10 percent (10%) of your paid claims total from this cycle to previously paid prospective payments. The amount will be applied to any account receivable that has been established as a result of the department making prospective payments during the transition to ACS/GHP. These adjustments will appear on your RA as a Financial Transaction.

Thank you for your continued participation and support of the Georgia Medicaid and PeachCare for Kids Programs.
